Extron Annotator

The Extron Annotator

Live Annotation, Switching, and Scaling in a Single Enclosure

The **Extron Annotator** is a high performance, hardware-based annotation processor that offers live annotation capabilities plus high performance scaling and switching on any type of display. With an intuitive graphical user interface, a presenter can easily draw, point, or add text to motion video or still images using a touch screen display and/or a keyboard and mouse. The Annotator's seven-input switcher supports analog and digital video formats including RGB, DVI, and HD-SDI, simplifying system design and significantly reducing overall system cost.

Supports popular touch screens

The Annotator is ideal for applications that require the overlay of graphics and text within A/V presentations, including law enforcement, medicine, education, telepresence, and live events.

Key Features:

- Real time annotations over high resolution PC and video graphics
- Independent Preview and Program outputs
- Hardware-based graphics and video processing
- Intuitive graphical user interface
- Integrated seven-input presentation switcher
- DVI and HD-SDI digital video inputs and outputs - various models are available to support DVI and HD-SDI signals
- RGB, HDTV, and video scaling with 72 selectable output rates up to 2048x1080 and HDTV 1080p/60
- Four simultaneous outputs including Extron MTP - Mini Twisted Pair
- Supports popular touch screen displays, keyboard, and mouse via multiple USB and PS/2 connections
