

# Fast and Easy Installation with SpeedMount™

## SM 3 Full Range Speaker

The Extron SM 3 is a compact, flush mount speaker designed for fast installation with the Extron-exclusive SpeedMount™ System. Speed up your speaker installations with a concealed speaker mount that can be installed during rough-in with speaker cable terminated to the integrated wiring contacts. During final construction, simply slide the speaker onto the mount, and secure into place with a “click” that also connects the speaker to the wiring contacts. The SM 3 delivers wide frequency response and wide coverage from a compact enclosure that optimizes voice intelligibility and music reproduction.

### Key Features:

- Compact full-range speaker
- Exclusive SpeedMount™ mounting system included with 0° and 10° mounting plates
- 8 ohm nominal impedance
- 3" (7.6 cm) full-range driver with a tuned bass reflex port
- Frequency response: 75 Hz to 18 kHz
- 15 watts continuous pink noise, 30 watts continuous program
- Flush mount design with shallow profile
- Speaker easily slides onto mount, connects to wiring contacts, and secures into place with a “click”
- Complies with ADA requirements when used with 0° mounting plate
- Hidden, toolless speaker release tab
- Black or white high-impact enclosure

### SpeedMount™ Mounting System

Concealed, toolless speaker mounting hardware simplifies and speeds up installation.

**STEP 1**  
Pull speaker wire.

**STEP 2**  
Attach plate to wall, stud, or electrical box and connect speaker wire to contacts on plate.

0° and 10° mounting plates

**STEP 3**  
Simply slide speaker onto plate.
